ABOUT ME

My name is Ola, I'm 19 years old, I love programming very much, and I have a passion for programming that drives me to learn more and delve deeper into programming languages, and this makes me very happy. I feel excited and enjoy when I start learning something new to improve my standards for the better. Through my experience of more than a year, I have been able to create the front-ends for some websites, so I am actively seeking the opportunity to delve deeper into this field and expand my scope of learning and knowledge. and I remain committed to self improvement and creative problem-solving, I am also looking forward to learning more technologies, and improve my skills in web development in order to push myself to the farthest point possible in the web development field and to use that in building my future projects, and make useful things that everyone can use it, learn from it and be a role of change and may be create a new language, to be a real contributor to the development of my country's economy.
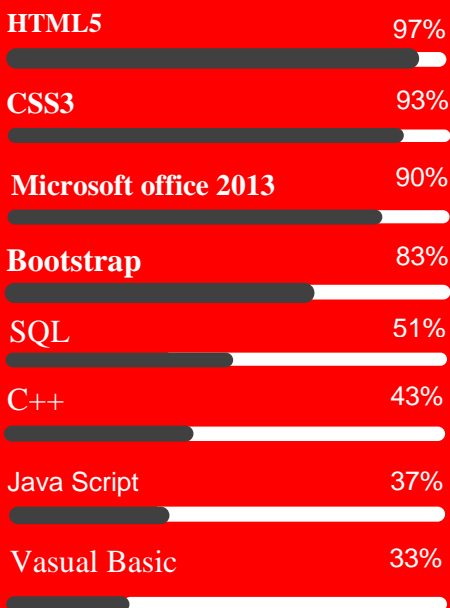

EDUCATION

I am studying in the final year at Computers Department, Industrial Technical Institute, affiliated with Technology College in Quesna.
